"Pelvic Organ Prolapse"

Director: Dr E.Tsakos

Live Surgery & International Faculty

Saturday **24 May 2025** 

Dear colleagues,

HERGS

It is with great pleasure and a deep sense of responsibility that we invite you to the 1st. "Pelvic Organ Prolapse" Masterclass, taking place at "St. Luke's Hospital" in Thessaloniki, Greece. The event is organized by «EmbryoClinic», is under the auspices of the Hellenic Robotic Gynaecological Society (HERGS) and is supported by the Hellenic Representative Committee of the Royal College of Obstetricians & Gynaecologists UK (RCOG), by SofMedica and by ISLE ACADEMY. The event has been duly notified to the National Organization of Medicines (EOF).

We are honored, to convene this pivotal event dedicated to one of the most under-recognized yet impactful conditions affecting women worldwide. Pelvic organ prolapse is not merely a medical issue—it is a silent epidemic that diminishes the quality of life for countless women, echoing through families and communities.

Our vision is to shed light on the silent suffering endured by women living with pelvic organ prolapse. Through evidence-based discussions, we will explore how pelvic organ prolapse impairs mobility, dignity, female function, and mental well-being and how treating it is not just about restoring anatomy, but about restoring life itself. Addressing this hidden burden is our clinical duty and our ethical and social responsibility.

We shall demonstrate the latest minimally invasive advancements, including the groundbreaking role of robotic surgery, which greatly improve the quality of life of our patients.

Aim of this masterclass is the strengthening of collaboration across disciplines and borders by uniting the insights of clinicians, researchers and health societies aiming to achieve the highest standard of care.

The future of healthcare is collective — and it starts here, together, in Thessaloniki, Greece. We warmly welcome you to join us for an inspiring, educational and transformative experience.

Warm regards from the Scientific Committee

Dr E. Tsakos

Prof. C. Brucker

Prof. D. Bolovis
